1. INTRODUCTION

1.1. Context

This document has been prepared in the context of Action 1.1 – Improving semantic interoperability in European eGovernment systems¹ of the European Commission's Interoperability Solutions for European Public Administrations (ISA) programme².

Studies conducted on behalf of the European Commission³ show that businesses and citizens still face difficulties in finding and re-using public sector information. In its communication on Open Data⁴ of 12 December 2011, the European Commission states that the availability of the information in a machine-readable format as well as a thin layer of commonly agreed metadata could facilitate data cross-reference and interoperability and therefore considerably enhance its value for reuse.

Much of the public sector information that would benefit from interoperability is published as datasets in data portals. Therefore, an agreement on a common format for data exchange would support the sharing, discovery and re-use of this data.

This document is the result of the Minor semantic change release process described in the Change and Release Management Policy for DCAT-AP⁵ and was built starting from DCAT-AP version 1.1⁶.

1.2. Scope of the revision

The objective of this work is to produce an updated release of the DCAT Application Profile based on requests for change coming from real-world implementations of the specification.

⁶ European Commission. Joinup. DCAT Application Profile for data portals in Europe. <https://joinup.ec.europa.eu/release/dcat-ap/11>

The Application Profile specified in this document is based on the specification of the **Data Catalog Vocabulary** (DCAT) developed under the responsibility of the Government Linked Data Working Group⁷ at W3C. DCAT is an RDF⁸ vocabulary designed to facilitate interoperability between data catalogues published on the Web. Additional classes and properties from other well-known vocabularies are re-used where necessary.

The work does not cover implementation issues like mechanisms for exchange of data and expected behaviour of systems implementing the Application Profile other than what is defined in the Conformance Statement in section 6.

The Application Profile is intended to facilitate data exchange and therefore the classes and properties defined in this document are only relevant for the data to be exchanged; there are no requirements for communicating systems to implement specific technical environments. The only requirement is that the systems can export and import data in RDF in conformance with this Application Profile.

1.3. The DCAT specification

The DCAT Application Profile defined in this document is based on the specification of the Data Catalog Vocabulary (DCAT) of 16 January 2014⁹.

<http://www.w3.org/TR/2014/REC-vocab-dcat-20140116/>

2. TERMINOLOGY USED IN THE DCAT APPLICATION PROFILE

An **Application Profile** is a specification that re-uses terms from one or more base standards, adding more specificity by identifying mandatory, recommended and optional elements to be used for a particular application, as well as recommendations for controlled vocabularies to be used.

A **Dataset** is a collection of data, published or curated by a single source, and available for access or download in one or more formats.

A **Data Portal** is a Web-based system that contains a data catalogue with descriptions of datasets and provides services enabling discovery and re-use of the datasets.

In the following sections, classes and properties are grouped under headings 'mandatory', 'recommended' and 'optional'. These terms have the following meaning.

- **Mandatory class:** a receiver of data **MUST** be able to process information about instances of the class; a sender of data **MUST** provide information about instances of the class.
- **Recommended class:** a sender of data **SHOULD** provide information about instances of the class; a sender of data **MUST** provide information about instances of the class, if such information is available; a receiver of data **MUST** be able to process information about instances of the class.
- **Optional class:** a receiver **MUST** be able to process information about instances of the class; a sender **MAY** provide the information but is not obliged to do so.
- **Mandatory property:** a receiver **MUST** be able to process the information for that property; a sender **MUST** provide the information for that property.
- **Recommended property:** a receiver **MUST** be able to process the information for that property; a sender **SHOULD** provide the information for that property if it is available.
- **Optional property:** a receiver **MUST** be able to process the information for that property; a sender **MAY** provide the information for that property but is not obliged to do so.

The meaning of the terms **MUST**, **MUST NOT**, **SHOULD** and **MAY** in this section and in the following sections are as defined in RFC 2119¹⁰.

In the given context, the term "processing" means that receivers must accept incoming data and transparently provide these data to applications and services. It does neither imply nor prescribe what applications and services finally do with the data (parse, convert, store, make searchable, display to users, etc.).

Classes are classified as 'Mandatory' in section 3.1 if they appear as the range of one of the mandatory properties in section 4.

¹⁰ IETF. RFC 2119. Key words for use in RFCs to Indicate Requirement Levels. <http://www.ietf.org/rfc/rfc2119.txt>

3. APPLICATION PROFILE CLASSES

3.1. Mandatory Classes

| Class name | Usage note for the Application Profile | URI | Reference |
|------------|--|---------------|---|
| Agent | An entity that is associated with Catalogues and/or Datasets. If the Agent is an organisation, the use of the Organization Ontology ¹¹ is recommended. See section 7 for a discussion on Agent roles. | foaf:Agent | http://xmlns.com/foaf/spec/#term-Agent , http://www.w3.org/TR/vocab-org/ |
| Catalogue | A catalogue or repository that hosts the Datasets being described. | dcat:Catalog | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-catalog |
| Dataset | A conceptual entity that represents the information published. | dcat:Dataset | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-dataset |
| Literal | A literal value such as a string or integer; Literals may be typed, e.g. as a date according to xsd:date. Literals that contain human-readable text have an optional language tag as defined by BCP 47 ¹² . | rdfs:Literal | http://www.w3.org/TR/rdf-concepts/#section-Literals |
| Resource | Anything described by RDF. | rdfs:Resource | http://www.w3.org/TR/rdf-schema/#ch_resource |

3.2. Recommended Classes

| Class name | Usage note for the Application Profile | URI | Reference |
|------------------|---|---------------------|---|
| Category | A subject of a Dataset. | skos:Concept | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-category-and-category-scheme |
| Category scheme | A concept collection (e.g. controlled vocabulary) in which the Category is defined. | skos:ConceptScheme | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-category-and-category-scheme |
| Distribution | A physical embodiment of the Dataset in a particular format. | dcat:Distribution | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-distribution |
| Licence document | A legal document giving official permission to do something with a resource. | dct:LicenseDocument | http://dublincore.org/documents/2012/06/14/dcmi-terms/?v=terms#LicenseDocument |

3.3. Optional Classes

| Class name | Usage note for the Application Profile | URI | Reference |
|------------------|--|--------------------|---|
| Catalogue Record | A description of a Dataset's entry in the Catalogue. | dcat:CatalogRecord | http://www.w3.org/TR/2013/WD-vocab-dcat-20130312/#class-catalog-record |

¹¹ W3C. The Organization Ontology. W3C Candidate Recommendation, 25 June 2013. <http://www.w3.org/TR/2013/CR-vocab-org-20130625/>

¹² IETF. BCP 47. Tags for Identifying Languages. <http://www.rfc-editor.org/rfc/bcp/bcp47.txt>

| | | | |
|----------------------|---|-------------------------|---|
| Checksum | A value that allows the contents of a file to be authenticated. This class allows the results of a variety of checksum and cryptographic message digest algorithms to be represented. | spdx:Checksum | http://spdx.org/rdf/terms#Checksum |
| Document | A textual resource intended for human consumption that contains information, e.g. a web page about a Dataset. | foaf:Document | http://xmlns.com/foaf/spec/#term-Document |
| Frequency | A rate at which something recurs, e.g. the publication of a Dataset. | dct:Frequency | http://dublincore.org/documents/dcmi-terms/#terms-Frequency |
| Identifier | An identifier in a particular context, consisting of the string that is the identifier; an optional identifier for the identifier scheme; an optional identifier for the version of the identifier scheme; an optional identifier for the agency that manages the identifier scheme | adms:Identifier | http://www.w3.org/TR/vocab-adms/#identifier |
| Kind | A description following the vCard specification, e.g. to provide telephone number and e-mail address for a contact point. Note that the class Kind is the parent class for the four explicit types of vCards (Individual, Organization, Location, Group). | vcard:Kind | http://www.w3.org/TR/2014/NOTE-vcard-rdf-20140522/#d4e181 |
| Linguistic system | A system of signs, symbols, sounds, gestures, or rules used in communication, e.g. a language | dct:LinguisticSystem | http://dublincore.org/documents/dcmi-terms/#terms-LinguisticSystem |
| Location | A spatial region or named place. It can be represented using a controlled vocabulary or with geographic coordinates. In the latter case, the use of the Core Location Vocabulary ¹³ is recommended, following the approach described in the GeoDCAT-AP specification. | dct:Location | http://dublincore.org/documents/dcmi-terms/#terms-Location |
| Media type or extent | A media type or extent, e.g. the format of a computer file | dct:MediaTypeOrExtent | http://dublincore.org/documents/dcmi-terms/#terms-MediaTypeOrExtent |
| Period of time | An interval of time that is named or defined by its start and end dates. | dct:PeriodOfTime | http://dublincore.org/documents/dcmi-terms/#terms-PeriodOfTime |
| Publisher type | A type of organisation that acts as a publisher | skos:Concept | http://www.w3.org/TR/vocab-adms/#dcterms-type |
| Rights statement | A statement about the intellectual property rights (IPR) held in or over a resource, a legal document giving official permission to do something with a resource, or a statement about access rights. | dct:RightsStatement | http://dublincore.org/documents/dcmi-terms/#terms-RightsStatement |
| Standard | A standard or other specification to which a Dataset or Distribution conforms | dct:Standard | http://dublincore.org/documents/dcmi-terms/#terms-Standard |
| Status | An indication of the maturity of a Distribution or the type of change of a Catalogue Record. | skos:Concept | http://www.w3.org/TR/vocab-adms/#status |
| Provenance Statement | A statement of any changes in ownership and custody of a resource since its creation that are significant for its authenticity, integrity, and interpretation | dct:ProvenanceStatement | http://dublincore.org/documents/dcmi-terms/#terms-ProvenanceStatement |

4. DCAT APPLICATION PROFILE PROPERTIES PER CLASS

A quick reference table of properties per class is included in Annex I.

4.1. Catalogue

4.1.1. Mandatory properties for Catalogue

| Property | URI | Range | Usage note | Card. |
|-------------|-----------------|--------------|--|-------|
| dataset | dcat:dataset | dcat:Dataset | This property links the Catalogue with a Dataset that is part of the Catalogue. | 1..n |
| description | dct:description | rdfs:Literal | This property contains a free-text account of the Catalogue. This property can be repeated for parallel language versions of the description. For further information on multilingual issues, please refer to section 8. | 1..n |
| publisher | dct:publisher | foaf:Agent | This property refers to an entity (organisation) responsible for making the Catalogue available. | 1..1 |
| title | dct:title | rdfs:Literal | This property contains a name given to the Catalogue. This property can be repeated for parallel language versions of the name. | 1..n |

4.1.2. Recommended properties for Catalogue

| Property | URI | Range | Usage note | Card. |
|---------------------------------|--------------------|--|--|-------|
| homepage | foaf:homepage | foaf:Document | This property refers to a web page that acts as the main page for the Catalogue. | 0..1 |
| language | dct:language | dct:LinguisticSystem | This property refers to a language used in the textual metadata describing titles, descriptions, etc. of the Datasets in the Catalogue. This property can be repeated if the metadata is provided in multiple languages. | 0..n |
| licence | dct:license | dct:LicenseDocument | This property refers to the licence under which the Catalogue can be used or reused. | 0..1 |
| release date | dct:issued | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the date of formal issuance (e.g., publication) of the Catalogue. | 0..1 |
| themes | dcat:themeTaxonomy | skos:ConceptScheme | This property refers to a knowledge organization system used to classify the Catalogue's Datasets. | 0..n |
| update/ modification date | dct:modified | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the most recent date on which the Catalogue was modified. | 0..1 |

4.1.3. Optional properties for Catalogue

| Property | URI | Range | Usage note | Card. |
|-------------------------|--------------|---------------------|---|-------|
| has part | dct:hasPart | dcat:Catalog | This property refers to a related Catalogue that is part of the described Catalogue | 0..n |
| is part of | dct:isPartOf | dcat:Catalog | This property refers to a related Catalogue in which the described Catalogue is physically or logically included. | 0..1 |
| record | dcat:record | dcat:CatalogRecord | This property refers to a Catalogue Record that is part of the Catalogue | 0..n |
| rights | dct:rights | dct:RightsStatement | This property refers to a statement that specifies rights associated with the Catalogue. | 0..1 |
| spatial / geographic | dct:spatial | dct:Location | This property refers to a geographical area covered by the Catalogue. | 0..n |

4.2. Catalogue Record

4.2.1. Mandatory properties for Catalogue Record

| Property | URI | Range | Usage note | Card. |
|---------------------------|-------------------|--|---|-------|
| primary topic | foaf:primaryTopic | dc:Dataset | This property links the Catalogue Record to the Dataset described in the record. | 1..1 |
| update/ modification date | dct:modified | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the most recent date on which the Catalogue entry was changed or modified. | 1..1 |

4.2.2. Recommended properties for Catalogue Record

| Property | URI | Range | Usage note | Card. |
|---------------------|----------------|--|---|-------|
| application profile | dct:conformsTo | rdfs:Resource | This property refers to an Application Profile that the Dataset's metadata conforms to | 0..1 |
| change type | adms:status | skos:Concept | This property refers to the type of the latest revision of a Dataset's entry in the Catalogue. It MUST take one of the values :created, :updated or :deleted depending on whether this latest revision is a result of a creation, update or deletion. | 0..1 |
| listing date | dct:issued | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the date on which the description of the Dataset was included in the Catalogue. | 0..1 |

4.2.3. Optional properties for Catalogue Record

| Property | URI | Range | Usage note | Card. |
|-----------------|-----------------|----------------------|--|-------|
| description | dct:description | rdfs:Literal | This property contains a free-text account of the record. This property can be repeated for parallel language versions of the description. | 0..n |
| language | dct:language | dct:LinguisticSystem | This property refers to a language used in the textual metadata describing titles, descriptions, etc. of the Dataset. This property can be repeated if the metadata is provided in multiple languages. | 0..n |
| source metadata | dct:source | dc:CatalogRecord | This property refers to the original metadata that was used in creating metadata for the Dataset | 0..1 |
| title | dct:title | rdfs:Literal | This property contains a name given to the Catalogue Record. This property can be repeated for parallel language versions of the name. | 0..n |

4.3. Dataset

4.3.1. Mandatory properties for Dataset

| Property | URI | Range | Usage note | Card |
|-------------|-----------------|--------------|---|------|
| description | dct:description | rdfs:Literal | This property contains a free-text account of the Dataset. This property can be repeated for parallel language versions of the description. | 1..n |
| title | dct:title | rdfs:Literal | This property contains a name given to the Dataset. This property can be repeated for parallel language versions of the name. | 1..n |

4.3.2. Recommended properties for Dataset

| Property | URI | Range | Usage note | Card |
|----------------------|--|-------------------|--|------|
| contact point | dcat:contactPoint | vcard:Kind | This property contains contact information that can be used for sending comments about the Dataset. | 0..n |
| dataset distribution | dcat:distribution | dcat:Distribution | This property links the Dataset to an available Distribution. | 0..n |
| keyword/tag | dcat:keyword | rdfs:Literal | This property contains a keyword or tag describing the Dataset. | 0..n |
| publisher | dct:publisher | foaf:Agent | This property refers to an entity (organisation) responsible for making the Dataset available. | 0..1 |
| theme/category | dcat:theme, subproperty of dct:subject | skos:Concept | This property refers to a category of the Dataset. A Dataset may be associated with multiple themes. | 0..n |

4.3.3. Optional properties for Dataset

| Property | URI | Range | Usage note | Card. |
|---------------|------------------------|----------------------|--|-------|
| access rights | dct:accessRights | dct:RightsStatement | This property refers to information that indicates whether the Dataset is open data, has access restrictions or is not public. A controlled vocabulary with three members (:public, :restricted, :non-public) will be created and maintained by the Publications Office of the EU. | 0..1 |
| conforms to | dct:conformsTo | dct:Standard | This property refers to an implementing rule or other specification. | 0..n |
| documentation | foaf:page | foaf:Document | This property refers to a page or document about this Dataset. | 0..n |
| frequency | dct:accrualPeriodicity | dct:Frequency | This property refers to the frequency at which the Dataset is updated. | 0..1 |
| has version | dct:hasVersion | dcat:Dataset | This property refers to a related Dataset that is a version, edition, or adaptation of the described Dataset. | 0..n |
| identifier | dct:identifier | rdfs:Literal | This property contains the main identifier for the Dataset, e.g. the URI or other unique identifier in the context of the Catalogue. | 0..n |
| is version of | dct:isVersionOf | dcat:Dataset | This property refers to a related Dataset of which the described Dataset is a version, edition, or adaptation. | 0..n |
| landing page | dcat:landingPage | foaf:Document | This property refers to a web page that provides access to the Dataset, its Distributions and/or additional information. It is intended to point to a landing page at the original data provider, not to a page on a site of a third party, such as an aggregator. | 0..n |
| language | dct:language | dct:LinguisticSystem | This property refers to a language of the Dataset. This property can be repeated if there are multiple languages in the Dataset. | 0..n |

| Property | URI | Range | Usage note | Card. |
|-------------------------------|-------------------|--|--|-------|
| other identifier | adms:identifier | adms:Identifier | This property refers to a secondary identifier of the Dataset, such as MAST/ADS ¹⁴ , DataCite ¹⁵ , DOI ¹⁶ , EZID ¹⁷ or W3ID ¹⁸ . | 0..n |
| provenance | dct:provenance | dct:ProvenanceStatement | This property contains a statement about the lineage of a Dataset. | 0..n |
| related resource | dct:relation | rdfs:Resource | This property refers to a related resource. | 0..n |
| release date | dct:issued | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the date of formal issuance (e.g., publication) of the Dataset. | 0..1 |
| sample | adms:sample | dcat:Distribution | This property refers to a sample distribution of the dataset | 0..n |
| source | dct:source | dcat:Dataset | This property refers to a related Dataset from which the described Dataset is derived. | 0..n |
| spatial/geographical coverage | dct:spatial | dct:Location | This property refers to a geographic region that is covered by the Dataset. | 0..n |
| temporal coverage | dct:temporal | dct:PeriodOfTime | This property refers to a temporal period that the Dataset covers. | 0..n |
| type | dct:type | skos:Concept | This property refers to the type of the Dataset. A controlled vocabulary for the values has not been established. | 0..1 |
| update/modification date | dct:modified | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the most recent date on which the Dataset was changed or modified. | 0..1 |
| version | owl:versionInfo | rdfs:Literal | This property contains a version number or other version designation of the Dataset. | 0..1 |
| version notes | adms:versionNotes | rdfs:Literal | This property contains a description of the differences between this version and a previous version of the Dataset. This property can be repeated for parallel language versions of the version notes. | 0..n |

4.4. Distribution

4.4.1. Mandatory properties for Distribution

| Property | URI | Range | Usage note | Card |
|------------|----------------|---------------|---|------|
| access URL | dcat:accessURL | rdfs:Resource | This property contains a URL that gives access to a Distribution of the Dataset. The resource at the access URL may contain information about how to get the Dataset. | 1..n |

4.4.2. Recommended properties for Distribution

| Property | URI | Range | Usage note | Card |
|-------------|-----------------|-----------------------|--|------|
| description | dct:description | rdfs:Literal | This property contains a free-text account of the Distribution. This property can be repeated for parallel language versions of the description. | 0..n |
| format | dct:format | dct:MediaTypeOrExtent | This property refers to the file format of the Distribution. | 0..1 |
| licence | dct:license | dct:LicenseDocument | This property refers to the licence under which the Distribution is made available. | 0..1 |

4.4.3. Optional properties for Distribution

| Property | URI | Range | Usage note | Card. |
|--------------------------|---|--|---|-------|
| byte size | dcat:byteSize | rdfs:Literal typed as xsd:decimal | This property contains the size of a Distribution in bytes. | 0..1 |
| checksum | spdx:checksum | spdx:Checksum | This property provides a mechanism that can be used to verify that the contents of a distribution have not changed | 0..1 |
| documentation | foaf:page | foaf:Document | This property refers to a page or document about this Distribution. | 0..n |
| download URL | dcat:downloadURL | rdfs:Resource | This property contains a URL that is a direct link to a downloadable file in a given format. | 0..n |
| language | dct:language | dct:LinguisticSystem | This property refers to a language used in the Distribution. This property can be repeated if the metadata is provided in multiple languages. | 0..n |
| linked schemas | dct:conformsTo | dct:Standard | This property refers to an established schema to which the described Distribution conforms. | 0..n |
| media type | dcat:mediaType, subproperty of dct:format | dct:MediaTypeOrExtent | This property refers to the media type of the Distribution as defined in the official register of media types managed by IANA. | 0..1 |
| release date | dct:issued | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the date of formal issuance (e.g., publication) of the Distribution. | 0..1 |
| rights | dct:rights | dct:RightsStatement | This property refers to a statement that specifies rights associated with the Distribution. | 0..1 |
| status | adms:status | skos:Concept | This property refers to the maturity of the Distribution | 0..1 |
| title | dct:title | rdfs:Literal | This property contains a name given to the Distribution. This property can be repeated for parallel language versions of the description. | 0..n |
| update/modification date | dct:modified | rdfs:Literal typed as xsd:date or xsd:dateTime | This property contains the most recent date on which the Distribution was changed or modified. | 0..1 |

4.5. Agent

4.5.1. Mandatory property for Agent

| Property | URI | Range | Usage note | Card. |
|----------|-----------|--------------|---|-------|
| name | foaf:name | rdfs:Literal | This property contains a name of the agent. This property can be repeated for different versions of the name (e.g. the name in different languages) | 1..n |

4.5.2. Recommended property for Agent

| Property | URI | Range | Usage note | Card. |
|----------|----------|--------------|---|-------|
| type | dct:type | skos:Concept | This property refers to a type of the agent that makes the Catalogue or Dataset available | 0..1 |

4.6. Category Scheme

4.6.1. Mandatory property for Category Scheme

| Property | URI | Range | Usage note | Card. |
|----------|-----------|------------------------------|--|-------|
| title | dct:title | rdfs:Literal | This property contains a name of the category scheme. May be repeated for different versions of the name | 1..n |

4.7. Category

4.7.1. Mandatory property for Category

| Property | URI | Range | Usage note | Card. |
|-----------------|----------------|--------------|--|-------|
| preferred label | skos:prefLabel | rdfs:Literal | This property contains a preferred label of the category. This property can be repeated for parallel language versions of the label. | 1..n |

4.8. Checksum

4.8.1. Mandatory properties for Checksum

| Property | URI | Range | Usage note | Card. |
|----------------|--------------------|-------------------------------------|---|-------|
| algorithm | spdx:algorithm | spdx:checksumAlgorithm_sha1 | This property identifies the algorithm used to produce the subject Checksum. Currently, SHA-1 is the only supported algorithm. It is anticipated that other algorithms will be supported at a later time. | 1..1 |
| checksum value | spdx:checksumValue | rdfs:Literal typed as xsd:hexBinary | This property provides a lower case hexadecimal encoded digest value produced using a specific algorithm. | 1..1 |

4.9. Identifier

4.9.1. Mandatory property for Identifier

| Property | URI | Range | Usage note | Card. |
|----------|---------------|--|---|-------|
| notation | skos:notation | rdfs:Literal typed with the URI of one of the members of the DataCite Resource Identifier Scheme ¹⁹ | This property contains a string that is an identifier in the context of the identifier scheme referenced by its datatype. | 0..1 |

¹⁹ DataCite Resource Identifier Scheme.
<http://purl.org/spar/datacite/ResourceIdentifierScheme>

4.10. Licence Document

4.10.1. Recommended property for Licence Document

| Property | URI | Range | Usage note | Card. |
|--------------|----------|--------------|---|-------|
| licence type | dct:type | skos:Concept | This property refers to a type of licence, e.g. indicating 'public domain' or 'royalties required'. | 0..n |

4.11. Period of Time

4.11.1. Optional properties for Period of Time

| Property | URI | Range | Usage note | Card. |
|-----------------|------------------|---|--|-------|
| start date/time | schema:startDate | rdfs:Literal typed as xsd:date xsd:dateTime | This property contains the start of the period | 0..1 |
| end date/time | schema:endDate | rdfs:Literal typed as xsd:date xsd:dateTime | This property contains the end of the period | 0..1 |

Please note that while both properties are optional, one of the two must be present for each instance of the class `dct:PeriodOfTime`, if such an instance is present.

The start of the period should be understood as the start of the date, hour, minute etc. given (e.g. starting at midnight at the beginning of the day if the value is a date); the end of the period should be understood as the end of the date, hour, minute etc. given (e.g. ending at midnight at the end of the day if the value is a date)

5. CONTROLLED VOCABULARIES

5.1. Requirements for controlled vocabularies

The following is a list of requirements that were identified for the controlled vocabularies to be recommended in this Application Profile.

Controlled vocabularies SHOULD:

- Be published under an open licence.
- Be operated and/or maintained by an institution of the European Union, by a recognised standards organisation or another trusted organisation.
- Be properly documented.
- Have labels in multiple languages, ideally in all official languages of the European Union.
- Contain a relatively small number of terms (e.g. 10-25) that are general enough to enable a wide range of resources to be classified.
- Have terms that are identified by URIs with each URI resolving to documentation about the term.
- Have associated persistence and versioning policies.

These criteria do not intend to define a set of requirements for controlled vocabularies in general; they are only intended to be used for the selection of the controlled vocabularies that are proposed for this Application Profile.

5.2. Controlled vocabularies to be used

In the table below, a number of properties are listed with controlled vocabularies that MUST be used for the listed properties. The declaration of the following controlled vocabularies as mandatory ensures a minimum level of interoperability.

| Property URI | Used for Class | Vocabulary name | Vocabulary URI | Usage note |
|------------------------|----------------|--------------------------------|---|--|
| dcat:mediaType | Distribution | IANA Media Types ²⁰ | http://www.iana.org/assignments/media-types/media-types.xhtml | |
| dcat:theme | Dataset | Dataset Theme Vocabulary | http://publications.europa.eu/resource/authority/data-theme | The values to be used for this property are the URIs of the concepts in the vocabulary. |
| dcat:themeTaxonomy | Catalogue | Dataset Theme Vocabulary | http://publications.europa.eu/resource/dataset/data-theme | The value to be used for this property is the URI of the vocabulary itself, i.e. the concept scheme, not the URIs of the concepts in the vocabulary. |
| dct:accrualPeriodicity | Dataset | EU Vocabularies Frequency | http://publications.europa.eu/resource/authority/frequency | |

²⁰ Internet Assigned Numbers Authority (IANA). Media Types
<http://www.iana.org/assignments/media-types/>

| Property URI | Used for Class | Vocabulary name | Vocabulary URI | Usage note |
|---------------|--------------------|---|--|---|
| | | Named Authority List ²¹ | | |
| dct:format | Distribution | EU Vocabularies File Type Named Authority List ²² | http://publications.europa.eu/resource/authority/file-type | |
| dct:language | Catalogue, Dataset | EU Vocabularies Languages Named Authority List ²³ | http://publications.europa.eu/resource/authority/language | |
| dct:publisher | Catalogue, Dataset | EU Vocabularies Corporate bodies Named Authority List ²⁴ | http://publications.europa.eu/resource/authority/corporate-body | The Corporate bodies NAL must be used for European institutions and a small set of international organisations. In case of other types of organisations, national, regional or local vocabularies should be used. |
| dct:spatial | Catalogue, Dataset | EU Vocabularies Continents Named Authority List ²⁵ , EU Vocabularies Countries Named Authority List ²⁶ , EU Vocabularies Places Named Authority List ²⁷ , Geonames | http://publications.europa.eu/resource/authority/continent/ , http://publications.europa.eu/resource/authority/country/ , http://publications.europa.eu/resource/authority/place/ , http://sws.geonames.org/ | The EU Vocabularies Name Authority Lists must be used for continents, countries and places that are in those lists; if a particular location is not in one of the mentioned Named Authority Lists, Geonames URI must be used. |
| adms:status | Catalogue Record | ADMS change type vocabulary | http://purl.org/adms/change-type/ | :created, :updated, :deleted |

| Property URI | Used for Class | Vocabulary name | Vocabulary URI | Usage note |
|--------------|------------------|--------------------------------|---|---|
| adms:status | Distribution | ADMS status vocabulary | http://purl.org/adms/status/ | The list of terms in the ADMS status vocabulary is included in the ADMS specification ²⁸ |
| dct:type | Agent | ADMS publisher type vocabulary | http://purl.org/adms/publisher-type/ | The list of terms in the ADMS publisher type vocabulary is included in the ADMS specification |
| dct:type | Licence Document | ADMS licence type vocabulary | http://purl.org/adms/licence-type/ | The list of terms in the ADMS licence type vocabulary is included in the ADMS specification |

5.3. Other controlled vocabularies

In addition to the proposed common vocabularies in section 5.2, which are mandatory to ensure minimal interoperability, implementers are encouraged to publish and to use further region or domain-specific vocabularies that are available online. While those may not be recognised by general implementations of the Application Profile, they may serve to increase interoperability across applications in the same region or domain. Examples are the full set of concepts in EuroVoc²⁹, the CERIF standard vocabularies³⁰, the Dewey Decimal Classification³¹ and numerous other schemes.

5.4. Licence vocabularies

Concerning licence vocabularies, implementers are encouraged to use widely recognised licences such as Creative Commons licences³², and in particular the CC Zero Public Domain Dedication³³, the Open Data Commons Public Domain Dedication and License (PDDL)³⁴, the ISA Open Metadata Licence³⁵, the European Union Public

6. CONFORMANCE STATEMENT

6.1. Provider requirements

In order to conform to this Application Profile, an application that provides metadata **MUST**:

- Provide a description of the Catalogue, including at least the mandatory properties specified in section 4.1.1.
- Provide information for the mandatory properties specified in section 4.2.1, if descriptions of Catalogue Records are provided – please note that the provision of descriptions of Catalogue Records is optional.
- Provide descriptions of Datasets in the Catalogue, including at least the mandatory properties specified in section 4.3.1.
- Provide descriptions of Distributions, if any, of Datasets in the Catalogue, including at least the mandatory properties specified in section 4.4.1.
- Provide descriptions of all organisations involved in the descriptions of Catalogue and Datasets, including at least the mandatory properties specified in section 4.5.1.
- Provide descriptions of all category schemes that contain the categories that are asserted in any of the descriptions of Datasets in the Catalogue, including at least the mandatory properties specified in section 4.6.1.
- Provide descriptions of all categories involved in the descriptions of Datasets in the Catalogue, including at least the mandatory properties specified in section 4.7.1.

For the properties listed in the table in section 0, the associated controlled vocabularies **MUST** be used. Additional controlled vocabularies **MAY** be used.

In addition to the mandatory properties, any of the recommended and optional properties defined in section 4 **MAY** be provided.

Recommended and optional classes may have mandatory properties, but those only apply if and when an instance of such a class is present in a description.

6.2. Receiver requirements

In order to conform to this Application Profile, an application that receives metadata **MUST** be able to:

- Process information for all classes specified in section 3.
- Process information for all properties specified in section 4.
- Process information for all controlled vocabularies specified in section 5.2.

As stated in section 3, "processing" means that receivers must accept incoming data and transparently provide these data to applications and services. It does neither imply nor prescribe what applications and services finally do with the data (parse, convert, store, make searchable, display to users, etc.).

7. AGENT ROLES

The DCAT Application Profile specified in this document has a single property to relate an Agent (typically, an organisation) to a Dataset. The only such 'agent role' that can be expressed in the current version of the profile is through the property `dct:publisher` (<http://purl.org/dc/terms/publisher>), defined as "An entity responsible for making the dataset available". A second property is available in the DCAT recommendation, `dcat:contactPoint` (http://www.w3.org/TR/vocab-dcat/#Property:dataset_contactPoint), defined as "Link a dataset to relevant contact information which is provided using VCard", but this is not an agent role as the value of this property is contact data, rather than a representation of the organisation as such.

In specific cases, for example in exchanging data among domain-specific portals, it may be useful to express other, more specific agent roles. In such cases, extensions to the base profile may be defined using additional properties with more specific meanings.

Two possible approaches have been discussed, particular in the context of the development of the domain-specific GeoDCAT Application Profile, an extension of the base DCAT Application Profile.

The first possible approach is based on the use of a predicate vocabulary that provides a set of properties that represent additional types of relationships between Datasets and Agents. For example, properties could be defined, such as `foo:owner`, `foo:curator` or `foo:responsibleParty`, in addition to the use of existing well-known properties, such as `dct:creator` and `dct:rightsHolder`. A possible source for such additional properties is the Roles Named Authority List⁴¹ maintained by the Publications Office of the EU. Other domain-specific sources for additional properties are the INSPIRE Responsible Party roles⁴², the Library of Congress' MARC relators⁴³ and DataCite's contributor types⁴⁴. To enable the use of such properties, they must be defined as RDF properties with URIs in a well-managed namespace.

A second approach is based on the use of W3C's PROV ontology⁴⁵ which provides a powerful mechanism to express a set of classes, properties, and restrictions that can be used to represent and interchange provenance information generated in different systems and under different contexts. In the context of work on GeoDCAT-AP, a

⁴⁴ DataCite Metadata Schema for the Publication and Citation of Research Data, version 3.1. In: https://schema.datacite.org/meta/kernel-3/doc/DataCite-MetadataKernel_v3.1.pdf, Appendix 1, table 5.

⁴⁵ W3C. PROV-O: The PROV Ontology. W3C Recommendation 30 April 2013. <http://www.w3.org/TR/prov-o/>

PROV-conformant solution for expressing agent roles was agreed⁴⁶. This solution uses `prov:qualifiedAttribution` in combination with a `dct:type` assertion pointing to the code list for Responsible Party Role in the INSPIRE registry. To enable the use of such types, they must be defined with URIs in a well-managed namespace.

Based on the experience gained with the use of domain-specific extensions for additional 'agent roles' in the exchange of information about Datasets, the base DCAT Application Profile may in the future be extended with additional roles that have proven to be useful across domains.

It should be noted that, even if a more expressive approach is used in a particular implementation, the provision of information using `dct:publisher` for the Catalogue is still mandatory under the rules laid down in the Conformance Statement in section 6, while the provision of information using `dct:publisher` is strongly recommended for Dataset. The provision of such information using `dct:publisher` will ensure interoperability with implementations that use the basic approach of DCAT-AP.

⁴⁶ European Commission. Joinup. DCAT application profile for data portals in Europe. GeoDCAT-AP – How to express the different responsible party roles supported in ISO 19115 / INSPIRE. <https://joinup.ec.europa.eu/discussion/geodcat-ap-how-express-different-responsible-party-roles-supported-iso-19115-inspire>

8. ACCESSIBILITY AND MULTILINGUAL ASPECTS

Accessibility in the context of this Application Profile is limited to information about the technical format of distributions of datasets. The properties `dcat:mediaType` and `dct:format` provide information that can be used to determine what software can be deployed to process the data. The accessibility of the data within the datasets needs to be taken care of by the software that processes the data and is outside of the scope of this Application Profile.

Multilingual aspects related to this Application Profile concern all properties whose contents are expressed as strings (i.e. `rdfs:Literal`) with human-readable text. Wherever such properties are used, the string values are of one of two types:

- The string is free text. Examples are descriptions and labels. Such text may be translated into several languages.
- The string is an appellation of a 'named entity'. Examples are names of organisations or persons. These names may have parallel versions in other languages but those versions don't need to be literal translations.

Wherever values of properties are expressed with either type of string, the property can be repeated with translations in the case of free text and with parallel versions in case of named entities. For free text, e.g. in the cases of titles, descriptions and keywords, the **language tag** is mandatory.

Language tags to be used with `rdfs:Literal` are defined by BCP47⁴⁷, which allows the use of the "t" extension for text transformations defined in RFC6497⁴⁸ with the field "t0"⁴⁹ indicating a machine translation.

A language tag will look like: "en-t-es-t0-abcd", which conveys the information that the string is in English, translated from Spanish by machine translation using a tool named "abcd".

For named entities, the language tag is optional and should only be provided if the parallel version of the name is strictly associated with a particular language. For example, the name 'European Union' has parallel versions in all official languages of the union, while a name like 'W3C' is not associated with a particular language and has no parallel versions.

For linking to different language versions of associated web pages (e.g. landing pages) or documentation, a content negotiation⁵⁰ mechanism may be used whereby different content is served based on the Accept-Languages indicated by the browser.

⁴⁷ Internet Engineering Task Force (IETF). BCP47. Tags for Identifying Languages. <http://tools.ietf.org/html/bcp47>

⁴⁸ Internet Engineering Task Force (IETF). BCP47 Extension T – Transformed Content. <http://tools.ietf.org/html/rfc6497>

⁴⁹ UNICODE Consortium. CLDR - Unicode Common Locale Data Repository. BCP47, transform_mt.xml. http://unicode.org/cldr/trac/browser/trunk/common/bcp47/transform_mt.xml

⁵⁰ Apache Web Server: content negotiation. <http://httpd.apache.org/docs/current/content-negotiation.html>

Using such a mechanism, the link to the page or document can resolve to different language versions of the page or document.

All the occurrences of the property `dct:language`, which can be repeated if the metadata is provided in multiple languages, **MUST** have a URI as their object, not a literal string from the ISO 639 code list.

How multilingual information is handled in systems, for example in indexing and user interfaces, is outside of the scope of this Application Profile.

9. ACKNOWLEDGEMENTS

This work was elaborated by a Working Group under the ISA programme. The ISA Programme of the European Commission was represented by **Suzanne Wigard** and **Fidel Santiago. Adina Dragan** and **Natasa Sofou** were the editors of the specification.

| dct:Location | Optional class | Updated | Added reference to GeoDCAT-AP for expression of co-ordinates | IM4 | 1.1 |
| dct:source | Optional property (CatalogRecord) | New | Range: dcat:CatalogRecord This property links to the original metadata that was used in creating metadata for the Dataset | MO5 | 1.1 |
| owl:versionInfo | Optional property (Dataset) | Updated | Updates URI: adms:version→owl:versionInfo | CO4 | 1.1 |
| spdx:algorithm | Mandatory property (Checksum) | New | Range: spdx:checksumAlgorithm_sha1 Cardinality: 1..1 This property identifies the algorithm used to produce the subject Checksum. Currently, | PR1 | 1.1 |

| | | | | | |
|--------------------|--------------------------------------|---------|--|--|---------------------|
| | | | SHA-1 is the only supported algorithm. It is anticipated that other algorithms will be supported at a later time. | | |
| spdx:Checksum | Optional class | New | A value that allows the contents of a file to be authenticated. This class allows the results of a variety of checksum and cryptographic message digest algorithms to be represented. | PR1 | 1.1 |
| spdx:checksum | Optional property (Dataset) | New | Range: spdx:Checksum Cardinality: 0..1 This property provides a mechanism that can be used to verify that the contents of a Distribution have not changed | PR1 | 1.1 |
| spdx:checksumValue | Mandatory property (Checksum) | New | Range: rdfs:Literal typed as xsd:hexBinary Cardinality: 1..1 This property provides a lower case hexadecimal encoded digest value produced using a specific algorithm. | PR1 | 1.1 |
| vCard:Kind | Optional class | Updated | <i>Updates</i> Class name: VCard → Kind URI: VCard → vcard:Kind The class Kind is the parent class for the four explicit types of vCards (Individual, Organization, Location, Group). | MO4 | 1.1 |
| dct:language | Optional property (Catalogue Record) | New | This property refers to a language used in the textual metadata describing titles, descriptions, etc. of the Datasets in the Catalogue. This property can be repeated if the metadata is provided in multiple languages. | PR28 | 1.1 |
| dct:provenance | Optional property (Dataset) | New | Range: dct:ProvenanceStatement This property contains a statement about the lineage of a Dataset. | PR6 , PR13 , PR14 , MO5 | 1.1 |
| dct:source | Optional property (Dataset) | New | Range: dcat:Dataset This property refers to a related Dataset from which the described Dataset is derived. | PR6 , PR13 , PR14 , MO5 | 1.1 |
| dct:accessRights | Optional property (Dataset) | New | Range: dct:RightsStatement This property refers to information that indicates whether the Dataset is open data, has access restrictions or is not public. | PR2 , PR3 | 1.1 |
| dct:hasVersion | Optional property (Dataset) | New | Range: dcat:Dataset This property refers to a related Dataset that is a version, edition, or adaptation of the described Dataset. | PR5 , PR16 , MO12 | 1.1 |
| dct:isVersionOf | Optional property (Dataset) | New | Range: dcat:Dataset This property refers to a related Dataset of which the described Dataset is a version, edition, or adaptation. | PR5 , PR16 , MO12 | 1.1 |
| dct:relation | Optional property (Dataset) | New | Range: rdfs:Resource This property refers to a related resource. | PR19 , MO12 | 1.1 |
| foaf:page | Optional property (Dataset) | New | Range: foaf:Document This property refers to a page or document about this Dataset. | PR19 , PR26 | 1.1 |
| dcat:mediaType | Controlled vocabulary | Updated | Modifications: MDR list → IANA types | PR22 , VO3 | 1.1 |
| dct:spatial | Controlled vocabulary | Updated | Modifications: Added recommendation to use sws.geonames.org if the needed place is not listed in the MDR | VO9 | 1.1 |
| dct:isPartOf | Optional property (Catalogue) | New | Range: dcat:Catalog This property refers to a related Catalogue in which the described Catalogue is physically or logically included. | nesting | 1.1 |
| adms:sample | Optional property (Dataset) | New | This property is related to sample(s) of the dataset | PR21 | 1.1 |
| foaf:page | Optional property (Distribution) | New | A page or document about this Distribution | MO2 | 1.1 |
| dct:hasPart | Optional property (Catalogue) | New | Range: dcat:Catalog This property refers to a related Catalogue that is part of the described Catalogue | nesting | 1.1 |

| | | | | | |
|------------------------|--|---------|---|----------------------------|---------------------|
| dcat:themeTaxonomy | Controlledvocabulary | Updated | Modification Changed the recommendation to use new EU Data Theme vocabulary proposed by the Publications Office instead of EuroVoc. Added clarification that value is the URI of the concept scheme, not of the concepts | VO2 | 1.1 |
| dcat:theme | Controlledvocabulary | Updated | Modifications: Changed the recommendation to use terms from the new EU Data Theme vocabulary proposed by the Publications Office instead of EuroVoc domains. URI: dct:theme ->dcat:theme | VO2 | 1.1 |
| dct:type | OptionalProperty (Dataset) | New | This property refers to a type of the Dataset | | 1.1 |
| dct:conformsTo | RecommendedProperty (Catalogue Record) | New | This property refers to an Application Profile that the Dataset's metadata conforms to | | 1.1 |
| dct:accrualPeriodicity | Controlledvocabulary | Updated | Modification Changed the recommendation to use terms from the Frequency Name Authority List maintained by the Publications Office instead of the Dublin Core Collection Description Frequency Vocabulary | | 1.1 |
| dcat:landingPage | Optionalproperty (Dataset) | Updated | <i>Updates</i> Cardinality: 0..1 → 0..n | Issue link | 1.1 |

Further textual changes(release 1.2):

- Updated the change management process in chapter 1 as now is based on Change and Release Management Policy for DCAT -AP.
- Updated Figure 1 - DCAT Application Profile UML Class Diagram
- Added column Release in the change log table
- Editorial fix in the quick reference in Annex I

Further textual changes (release 1.2.1):

- Updated Figure 1 - DCAT Application Profile UML Class Diagram
- Updated references 21-27 and 41 to point from Metadata Registry (MDR) to EU Vocabularies
- In section 5.2 Controlled vocabularies to be used, updated the entries in table column "Vocabulary name" (MDR-> EU Vocabularies)
- MDR has been replaced with EU Vocabularies within text.
- Updated joinup references: 6, 13, 28, 35, 36, 46.
